Jessie James Rafael

DEVELOPER + DESIGNER

I've been in this field for **more than 10 years**, with expertise in **Front-end Dev, UI/UX and Illustrations**. I've had the opportunity to work on projects based in the Australia, US, Singapore, Thailand and Manila. I've also volunteered with local developer community events. And yes, I'm one of those humans who can bridge both world: visual design and engineering.

UI/UX FRONT-END DEVELOPER

Entegy Australia (Remote)
Apr 2024 - May 2026 (2yrs)

Work Summary

- Responsible for the overall UI/UX revamp focused on the web-based platform using **Figma**
- Implement **new UI** and functions on **Front-End using Vue** dev stack
- Help integrations of feature and bugfixes on Front-End
- Help with **UI consistency** with other platforms (Kiosk Platform, Mobile App)
- Involved in Front-End Design & **Component Documentation** through **Storybook**

SENIOR UI/UX FRONT-END DEVELOPER

Talentscout/Headhuntr.io Makati (4yrs)
Sep 2023 - Apr 2024 (Part-time / Remote)
Sep 2019 - Sep 2023 (Full-time / Remote)

Work Summary

- **Lead Product UI/UX** design for **4 years**
- Started from **wireframing and user research, user journey, prototyping** up to the post-release enhancements.
- Which successfully launched last 2022 and started accommodating users.
- I worked closely with the technical team, sales team, and executives.
- For the UI/UX, I used **Adobe creative suite, Zeplin** Google services and Jira
- I co-developed the first stage of front-end and UI components of the product using modern dev stack including **ReactJS, Redux, and git**
- I created **Design System** and **Interaction standardization**.
- I also worked and collaborated on other projects including the Revamped Company website and API-driven service platform.

Development *UI/UX* *GD/Illustration* *Others (Infrastructure, Database Mngt, Marketing)*

Jessie James Rafael

DEVELOPER + DESIGNER

SENIOR FRONT END DEVELOPER

Mosed Inc/MyAssets Makati
Jan 2018 - Jun 2019 (1yr & 5mos)

Work Summary

- **Lead Front-end team** and product development for 1 year + 5 months.
- I was assigned to continue the front-end development of the main product using modern **React dev stack** like
- I also helped to optimize the code structure through ESLinting, **UI componentization** and reducing redundant codes.
- I was also assigned to train junior devs and delegate tasks.

WEB DEVELOPER

Lotus Labs Inc Taguig
Dec 2015 - Dec 2017 (2 yrs)

Work Summary

- I worked on 14 different projects with this company.
- I developed and designed most of the projects I handled which includes handful of online gaming platforms and internal administrative/technical web tools.
- I'm also assigned to manage the social media and blog contents.
- I **lead a small multi-function team, project, front-end dev** up to the client demo and monitor releases.
- For development we used, **Native JS, Redux, handlebars, Wordpress and Grunt**
- For UI Designs, I used **Adobe Creative Suite, Sketch and Invision**

FRONT END DEVELOPER

Tickled Media Makati, Singapore, Bangkok, Mumbai
Apr 2014 - Nov 2015 (1yr & 7mos)

Work Summary

- I developed the initial **UI of a social platform** targeted for parents.
- I also worked on converting **UI designs into web pages & CMS templates**.
- I was given the opportunity to travel to other Asian regions to **understand more about the users** and work closely with the Technical team, Marketing team and Writers.
- I was also assigned to **deploy Ad placements** to all web platforms.

ENTEGY

Entegy Events Revamp

A complete redesign on both User Interfacer and Front-End Technology. The project involved creating a new design system, new UI, and maintaining the core functionalities across multiple platform such as Web App, Native Mobile App and Kiosks Interface.

Aspect: UI/UX Design

Merks Games

Merks Games is an advanced version of "Alias Deck" game I built. But with more apps/games within this project. I started it as a personal quick-project to simply recall my dev stacks but turned into something more. I used same technology with my recent works: ReactJS, Firestore Real-time database and Firebase authentication, then wrapped with bold visuals and practical interactions.

Above are some sample UI we developed and style guidelines I documented for this project.
And for comparison, here's an original design made before I joined the team:

The entire design process took steps to further make it better through researches and BIG data analysis. It was succesfully launched last year and helped ~20 accounts to grow their business and team.
